HITEC
HawkEye
CONTENTS

Main Airframe

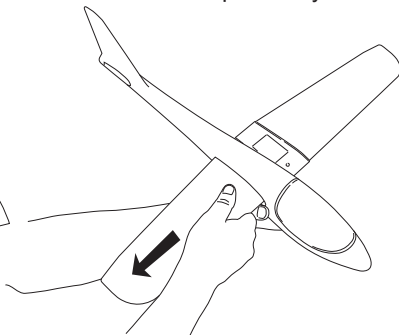

Main Wing

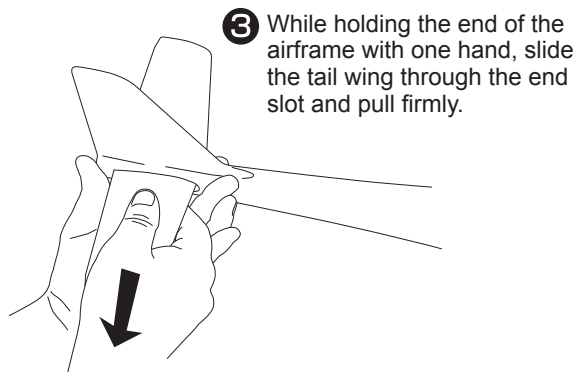

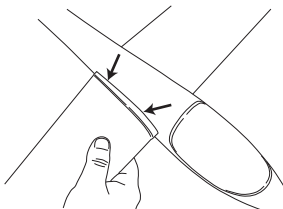

Tail Plane

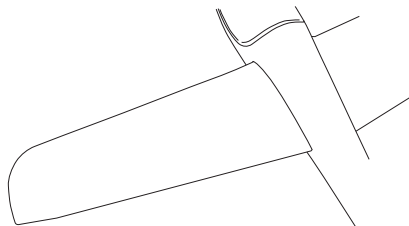

- 1** While holding the airframe with one hand, slide the main wing (logo side up) through the middle slot and pull firmly.

- 2** Continue pulling the main wing through the middle slot until it fits tightly into the notched area.

- 4** The HawkEye is now assembled.

You are ready to fly! Simply hold the underside of the airplane as shown, aim it straight and throw.
