

SUPREME IIS DUAL CONVERSION RECEIVER

Hitec's trusted series of Dual Conversion Supreme Receivers has been updated with the New 8 channel Supreme IIS featuring AUTO SHIFT! The Supreme IIS can be used with any brand of modern FM transmitter regardless of positive or negative shift eliminating the need for two separate versions of the same receiver. Additional improvements in this high performance receiver include a more compact case and a 26% savings in weight.

Supreme IIS

MODEL	DIMENSIONS	WEIGHT	MISC	PART #	PRICING
Supreme IIS	2.0"x .2" x0.08"	0.99 oz	8 Channels FM Ultra Narrow Band	23972	\$54.99 Street
AUTO SHIFT	All new Hitec receivers with Auto Shift are available in just one version and can be used with any brand of modern FM transmitter				
AGC	Receivers that feature Auto Gain lock onto the transmitter's signal with higher accuracy than ever before and can even discriminate between two transmitters on the same channel.
